- Pavani Gujjarlapudi
- Sai Anurag Malyala
- Sai Gautam Mandapati
- Sakshi Chaudhary
- Sathvik Joshyula
- Tharindu Chamara Nauththuduwa Liyanage

Dear Mr Cox & Mr Yu,

We look forward to reporting the progress of this sprint. We have captured the following points to update you on how things are going and if we have encountered any hurdles in our execution.

This recent sprint focused on finalising all our deliverables for the conclusion of the trimester and our project. We finalised many important documents and completed two presentations including the Market Research Presentation and the Design Document Presentation. Additionally, we have our finalised copies of the Design Document, as well as the Market Research Document. Furthermore, our team has been working on creating a dummy database and looking at Restful API creation. As this is our last sprint of the trimester, we do not have any other work to complete, however there has been focus on the handover to next trimester and the continuation of the project. We have been analysing and understanding the teams code and design to be able to continue and build upon the project in the coming trimester.

**Outcome(s) of this Sprint:**

- Completed deliverables
- Completed Market Research Presentation
- Completed Design Document Presentation

**Activities this Sprint:**

- Working on Dummy Database
- Working towards the handover
- Organising final meetings and handing over deliverables

**Activities that will occur next Sprint:**

- As this is our final sprint of the unit there are no activities that will occur in the next sprint

**Proposed amendments to Scope:**

- As advised by our supervisor we are on track with our project and therefore no amendments need to be made at this point in time

Please let us know if you have any questions.

Sincerely,  
CSIRO Squad 1 Team
